Professional Summary

Cybersecurity professional at PwC Risk Consulting Advisory with hands-on, end-to-end experience across SOC monitoring, SIEM migration, IS Audit, and digital forensics. Skilled in investigating suspicious user-login activity, deploying and tuning SIEM platforms (IBM QRadar, Cortex XSIAM, Google SecOps), and translating complex security concepts into clear client-facing presentations, including sessions on quantum computing's impact on cryptography and Software Bill of Materials (SBOM) practices. Trained and certified in ISO/IEC 27701 (Privacy Information Management) with additional exposure to India's Digital Personal Data Protection (DPDP) Act, adding a privacy and compliance lens to security work. Recognized by multiple clients for reliable, detail-driven delivery. Seeking to bring this blend of technical, privacy, and communication strength to a security operations or consulting role.

Professional Experience

PwC – Risk Consulting Advisory

Sep 2025 – Present

- Performed IS Audit engagements, assessing IT general controls, access management, and compliance for enterprise clients.
- Led and supported SOC SIEM migration efforts, including planning and execution of platform transitions with minimal monitoring downtime.
- Carried out collector installation, log source onboarding, and log parsing/normalization for accurate event ingestion.
- Performed SOC L1 monitoring: triaging alerts, investigating anomalies, and escalating incidents per defined playbooks.
- Conducted forensic investigation of suspicious user-login activity, analyzing authentication logs and access patterns to identify anomalies and support incident conclusions.
- Delivered client-facing presentations on emerging security topics, including the impact of quantum computing on cryptography and Software Bill of Materials (SBOM) practices.
- Worked extensively on IBM QRadar, Palo Alto Cortex XSIAM, and Google SecOps.
- Received multiple client appreciations for consistent, reliable delivery.

Core Cybersecurity Skills

- **SIEM & SOC Operations:** IBM QRadar, Cortex XSIAM, Google SecOps, log collector deployment, log parsing/normalization, alert triage, SOC L1 monitoring
- **Security Auditing:** IS Audit, IT general controls (ITGC), access control assessment, compliance evaluation
- **Incident Response:** Alert investigation, escalation workflows, playbook-driven triage
- **Cloud & Identity Security:** Azure security fundamentals (AZ-500)
- **Offensive Security Fundamentals:** CEH-aligned knowledge of vulnerability assessment and attack techniques

Certifications

- Certified Ethical Hacker (CEH)
- Microsoft Security Operations Analyst (SC-200)
- Microsoft Certified: Azure Security Engineer Associate (AZ-500)
- ISO/IEC 27701 (Privacy Information Management) – Trained and Certified
- Digital Personal Data Protection (DPDP) Act – Training Attended

Education

- **B.Tech – Computer Science and Design**, Vel Tech University 2025
CGPA: 9.09/10
- **12th Grade**, Nirmala Matric Higher Secondary School 2021 – 82%
- **10th Grade**, Nirmala Matric Higher Secondary School 2019 – 76%

Internship

Revotran Technologies – Quality Analyst Intern 6 Months

- Performed manual and automated testing, bug fixing, and security-relevant script optimization on the OneResi project.
- Collaborated with the development team to enhance functionality, security features, and platform reliability.

Key Projects

- **Scheme Providing Website for Rural Areas** – Built a website for rural residents to apply for government schemes, with a secure admin interface and access controls. *HTML, CSS, JavaScript, Node.js, Express, MySQL, MongoDB, JWT*
- **Anti-Sleeping Glass** – Wearable safety device using Arduino Nano with buzzer/LED alerts to prevent drowsiness. *Arduino Nano, Sensors, Arduino IDE*

Additional Technical Skills

- **Programming:** Java (OOP concepts, exception handling), Python (basics), SQL (queries, joins, filtering)
- **Web:** HTML5, CSS3, JavaScript basics
